

ST. AUGUSTINE

PARISH

Enel North America is a clean energy leader working to electrify the economy and build a zero-carbon future, developing wind, solar and battery storage sites along with other advanced energy technologies across the U.S.

Enel has arranged with the Archdiocese of New York and our parish to lease a portion of land on our unused lower field, away from all parish and school activities, to install a state-of-the-art battery system. All local, county and state requirements have been met, and the site will be monitored remotely 24/7 by Enel's operations center. The lease will bring yearly income to our parish, support power grid reliability, and help enable the adoption of more renewable energy onto the grid.
